

BUMA Fish and Integrated Farm story

Presented

by

Zippy Shiyoya - BUMA FARM

Ellen Savude – Aga Khan Academy Mombasa

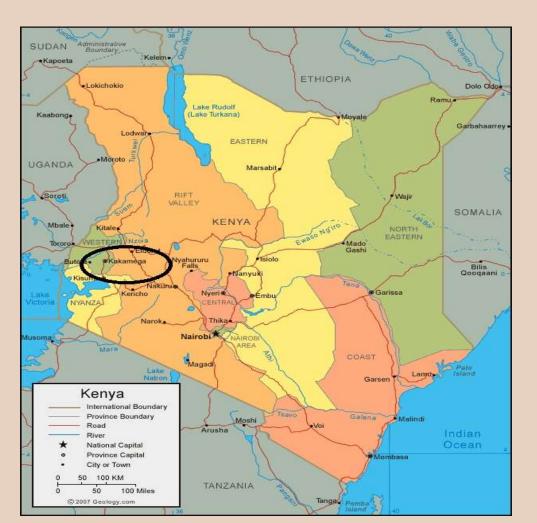

8th Global RCE Conference, Nairobi

28th Nov. 2013

Introduction

BUMA FISH & INTEGRATED FARM

RCE Western - is Located in Kakamega

22 Constituencies

RCE Partners

Include

Formal Education:

Universities: MMUST for RCE Kakamega

Primary and Secondary schools

Non Formal Education

Local businesses eg Buma Fish Farm for RCE Kakamega

Local NGOs

Local governments

The BUMA story using

12 Step Kaizen story - Methodology

What is the Kaizen methodology

What does it mean Kaizen?

Kaizen = Continuous Improvement

Kaizen philosophy is based on a principle:

"Energy comes from bottom line", so that in a company the result is not only due to management decisions but, in most cases, it's due to direct activities on products and processes.

Kaizen route 12 steps

 Identify Losses Select & Justify the Subject 3 Understand process and Equipment 4 Grasp actual situation 5 · Establish an objective 6 Make a plan Causes analysis 8 Propose countermeasures Implement countermeasures 10 Verify results 11 Standardisation 12 Future themes

Seven steps for the losses causes research

Two steps for the research of solution

Three steps to finalise the Team activity

More than half of the Kaizen steps is dedicated to the research of the causes of the losses, only two for the solution research.

BUMA Fish and Integrated Farm

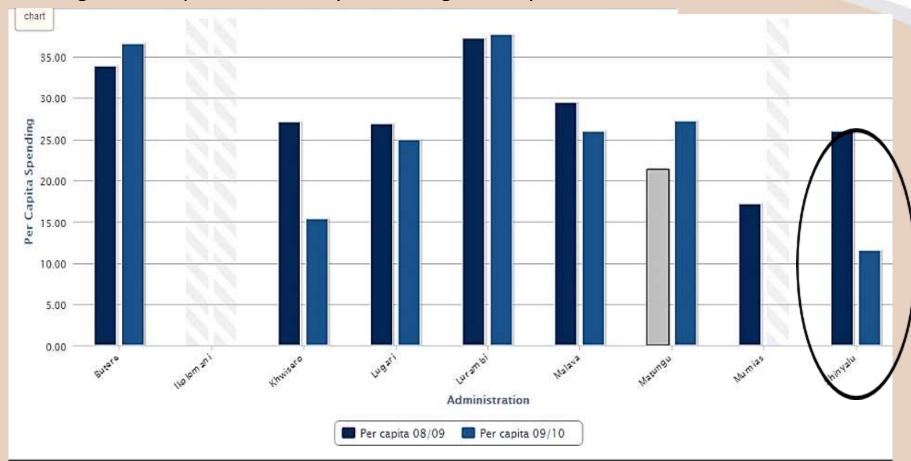

Average per capita spending

Average income per constituency - Kakamega County in Ksh

Average income per day for an individual in Shinyalu constituency (2010/2011) was \$USD 0.34cents

Understanding situation

Demographics - 2010

- ✓ Population 1,660.651
- √ The average amount of rainfall Shinyalu

is between 1800-2100mm per annum

- ✓ The average size of farms within the area is 0.5ha.
- ✓ Average income per day for an individual in Shinyalu constituency was \$USD 0.34cents.
- √ 63% of the population lives below the poverty line of \$1.25 a day area is 0.5ha.

BUMA Farm

Established in 2009, a small scale holding that has undergone transformation from Perennial Maize Crop production to Horticulture and Fish production.

BUMA Farm is located in Isukha East, Muranda, Shamiloli Road,

Shamiloli Market, Kakamega County

Objective

✓ Drive behaviour change through food production, secure food supply and security every day of the year.

Master Plan

	BUMA FARM MASTER PLAN									
		Activity		2009 - 2012	2013	2014				
	1	Losses causes Reaserch/use of Problem solving tools								
			Act							
	2	Reasearch of solutions/propose & Implement counter measures	Plan							
			Act		In progress					
	3	Check Results/verify/standardize/future themes	Plan							

What is the problem (why the project)

Using a problem solving tool 5W + 1H

What is it?

✓It is basically a checklist, with a series of questions, whose answers drive us to understand and correlate the phenomenon to the machine, men, method, material and environment

What is it for?

√To understand the phenomenon

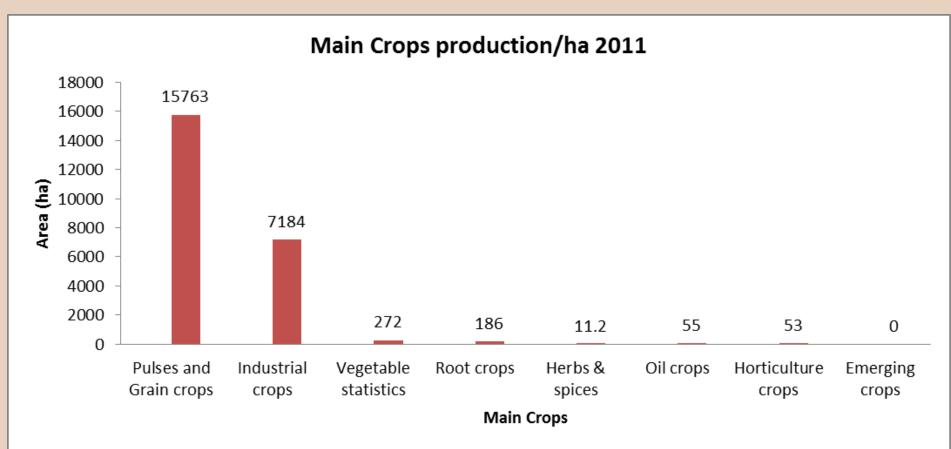

When is it used?

✓ At beginning of an improvement work, during the phase of the current situation understanding

A good understanding of the initial situation will facilitate a lot the analysis to be done later.

1. What — Checks for variation in production (Main crops)

Conclude: There is a variety of food crops produced in the area.

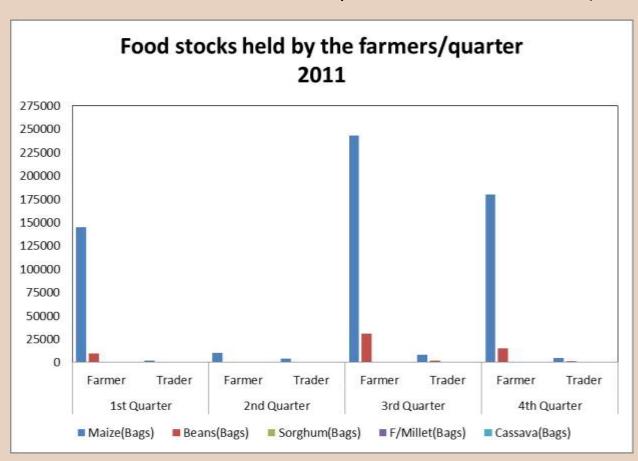

2. Which — Check for time or period-related variations (Food stocks patterns)

- ✓ Food availability fair, throughout the year
- ✓ Q2 Apr-June lowest stocks, harvest of the previous year being depleted
- ✓ Q3&Q4 Aug Dec fresh harvest for Maize
- ✓ Q3 June August fresh harvest for beans
- ✓ Q4 Dec fresh harvest for beans Please note farmers replenish their stocks immediately because of insecurity

Conclusion: There is food throughout the year, with a variation related to harvesting periods

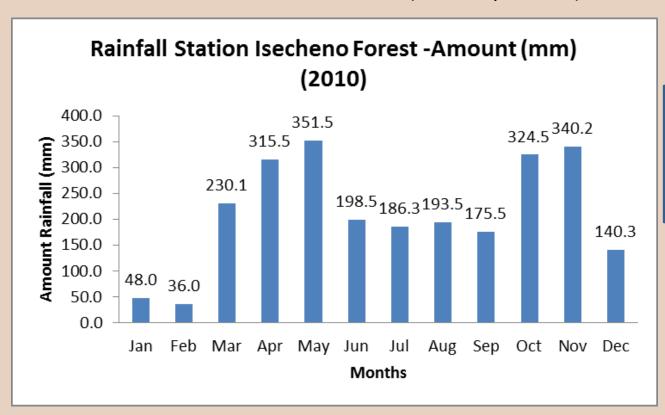

3. When — Trend related to weather (Rainfall patterns)

- ✓ Total amount of Rain 2539.93 mm
- ✓ County experiences bimodal rainfall pattern
- ✓ Long rains March to August
- ✓ Short rains September October
- ✓ Average rainfall 1500-2100mm p.a.

Conclusion: Enough rain to support farming, making it an attractive venture

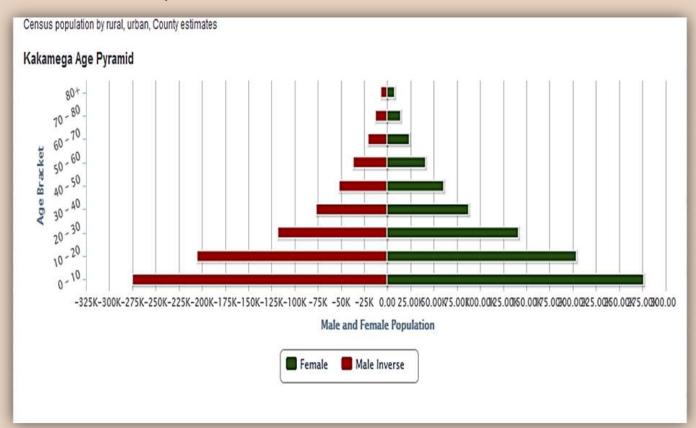

BUMA FISH & INTEGRATED FARM

4. Who - Population

Conclusion: Average age of those involved in farming is 59.4, own the land and practising farming. This shows the pressure the elderly are under to feed the young ones, a lot of them orphans

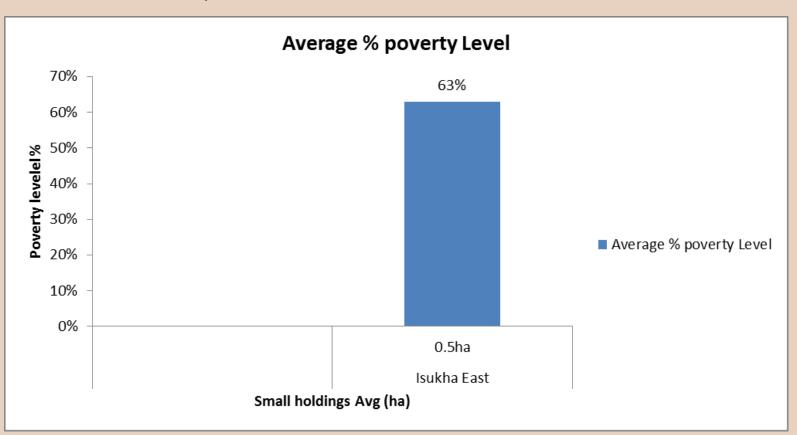

5. Where — Machinery/Mechanization

Conclude: Average size of farms is 0.5ha – small land holding, coupled with high poverty levels, attracts manual labour vs. use of farm equipment

How — How the problem disclose

Farming Practices

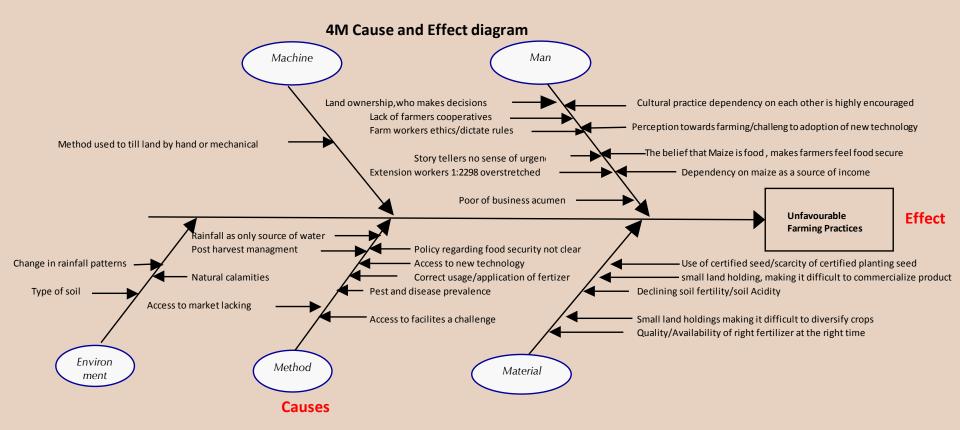

4M Causes Analysis tool

It has a fish-bone structure graphically representing the relationship between an effect and its possible causes

5 Why Analysis

Problem	Why	Why	Why	Why	Why	Action	Responsible	Deadline
	,	,					•	
Il ack of farmers cooneratives	'	Lack of trust in cooperatives	IV//rangias in the	Mismanagement of resources	Bad Leadership	Set up a pilot, with good governance to return confidence	County government / BUMA Farm	2016
						Study and Review existing Cooperative Rule book		
						Create a market for the produce		
	Inractises	Production is rain fed	Practise is dependent on rainfall patterns	Farmers do not know better	Access to information	Spread the harvest through out the year	County Government	2015
						Implement a pilot project with irrigation		
						Pilot project rain harvesting		
						Write a policy regarding imports into the county		

Proposing and Implementing Counter

Measures

Counter Measures

WHO	WHAT	WHEN	STATUS
	1. Fish Pond		
	Construct an inland fish Pond		Done
Zippy/dorcas/Leonard	Buy reading material		Done
	Explore Fish feed production		Ongoing
	Create a relationship with Field extension workers		Done
	2. Green House		
	Installed a Green house		Done
Zinny	Partnered with Min of Agriculture Tomatoes	2011	Done
Zippy	Partnered with Chemical co. Tomatoes	2011	Done
	Engaged an Agronomist with Tomatoes		Done
	Tried other Kale production		Done
Zippy	3. Mechanization/Technology		
	Installed drip irrigation - 1 acre	2013	Done
	Production planning for production		Done
	Collecting local data		Done
	Add value to the vegetables (pluck and wash)		Done
	Engaged a consultant - new trial for tomatoes		Ongoing
BUMA Farm	4. Crop Production - African leafy vegetables	2009	Done
Zippy/Peninah	5. Awarded a tender at a local Hotel in Kakamega	2009	Done
Zippy/Dorcas	6. Formed a Women's group -" Mukulusu every day Food Group"		Done
	Facilitate registration of the group with Min. of Gender and Youth		Dono
	Affairs		Done
	Qualified for a loan Ksh (50,000) from Women Enterprise,	2011	Dono
	repaaymnets nearly complete		Done
	Financial literacy training - Equity bank		Done
	Group Account		Done
	BUMA Farm Provided them with a meeting venue		Ongoing

3 steps to finalise BUMA Farm team Activity - 2014

- 1. Verify Results
- 2. Standardization
- 3. Future themes

Future themes 2014

- 1. Upscale
- 2. Processing
- 3. Marketing

Further Recommendations

- ✓ Engage County Governments to introduce a Policy to drive mind-set change, on Nutrition and Agribusiness
- ✓ Restructure field workers portfolio to reach ALL farmers with the correct information
- ✓ Monitor and evaluate field workers impact on the community.
- ✓ Policy on imported farm products into the counties, thus creating a market for local produce. This will create job opportunities in production, Marketing the produce and Logistics
- ✓ Identify Demo plots for showcasing farming (agricultural shows are good but unrealistic)
- Introduce a community agriculture day to talk about agriculture, the opportunities, new seed, fertiliser; disease; new crops e.g. now we have sugar cane what does it mean to the farmer this is for peasant farmers

Thank you
