The School Empowerment and Nutritional Supplementation through Agriculture (SENSA) project initiated and funded by the Association of Female Appointees and Wives of Niger State Officials (AFAWNSO), that seeks to contribute towards addressing the challenge of quality nutrition and relevant education by reviving the school-gardening culture through sustainable horticulture of vegetables and fruit trees, and various life-skills training has within its very short life span, attracted both national and global recognition. Few of these recognitions and awards are:

- i. The appointment of AFAWNSO as the Co-Chair of the National Planning Committee of Nigerian Environmental Society (NES) 29th Conference/AGM in Minna in 2018.
- ii. The award of **Green Label to the wife of the Governor** due to her initiation and funding of SENSEA project (November, 2018).
- iii. The Regional Center of Expertise (RCE) Outstanding Flagship Project award by the Regional Center of Expertise Global office, United Nations University Institute for the Advance Study of Sustainability (UNU-IAS) Tokyo, Japan (December, 2018).

Therefore, as part of the strategy to consolidate and sustained the SENSEA project objectives across the 15 selected boarding schools across the 3 geopolitical zones, the Regional Centre of Expertise (RCE) Minna recommended a **Consolidation Workshop** with all the 15 SENSEA schools. The workshop provided avenue for the funder and participating schools to review the project performance and also to motivate the schools through **presentation of awards to the first 3 best performing schools and issued certificates of participation to the 15 schools**. This workshop and award presentation, we believe, will entrench the concept of providing sustainable nutrition for School Students and enhance their learning environment.

The programme was the largest gathering of secondary school students in Niger State with over 1000 participants from across the state. The first position got around \$280 (N100,000), the first runner up had about \$200 (N70,000) and the second runner up got about \$140 (N50,000) respectively.

In her remarks, the special guest of honour, Her Excellency the wife of the Executive Governor of Niger State and Chairperson AFAWNSO Dr. Amina Abubakar Sani Bello appreciated RCE Minna for their commitment, dedication and accountability in implementing the SENSEA project of behalf of their association. She further reiterated the need for the schools to take ownership of the project. Earlier, the coordinator of RCE Minna Dr. Abdul Husaini gave an overview on the activities of RCE Minna and the Global RCE movement and further shade more light on the SENSEA project. There were several goodwill messages and remarks from Mallam Nuruddeen Lemu of RCE Minna, Professor Abdullahi Bala the Vice Chancellor of Federal University of Technology, Minna, Professor Muhammad Nasir Maiturare the Vice Chancellor Ibrahim Badamasi Babangida University Lapai, Dr. Moayad Alrachid founder Royal Institute for Training and Human Capital Development KM6 , Abuja-Zuba.
