

# CALL FOR PAPERS

## ASEAN Education Cities Conference 2022

The ASEAN Education Cities Conference 2022 will serve as a platform for researchers and scholars from academia, industry, organisations and other stakeholders, to share their ideas, best practices or research findings on smart and sustainable cities, and to work together towards developing and exploring new ways of educating the next generations of planetary-health caretakers.

The AECC 2022 focuses on the way cities function as spaces for education, but also how educational institutions can support the sustainable development of cities and communities, through research, teaching, policy advising and public engagement.

Sunway University

5 - 6 November 2022

**CFP DEADLINE:**  
**30 JULY 2022**

**Venue:**  
Sunway University

**Presenter fees:**  
RM255 (in-person with lunch & refreshment)  
RM455 (in-person with lunch, refreshment & dinner)

### Important dates:

Submission deadline:	30 July 2022
Notification of acceptance:	15 August 2022
Payment deadline:	30 Sept. 2022
Submission of full article:	30 March 2023 (long version: 5,000 to 8,000 words)

The Organising Committee of the AECC 2022 invites submissions of **proposals (300 to 400 words) for 15-minute papers.**

All submitted proposals will be reviewed by the conference Scientific Committee

In 2021, Sunway University made a landmark decision to offer a module on sustainability to all its students. Meanwhile, the Malaysian government has launched the 10-10 MySTIE framework and the Shared Prosperity Vision 2030 to support the future of its cities and towns.

These initiatives point to the need to rethink how we should link education and cities. What are the best practices in sustainable urban development and city governance? What can we learn from city leaders? How can research on cities be integrated into the curriculum and have an impact on society through internal and external engagement?

We invite proposals that examine cities as case studies. We are particularly keen to receive proposals that examine cities as laboratories.

#### **THEME 1 - SUSTAINABLE AND RESILIENT CITIES**

How can ASEAN cities cope with crises, stresses and shocks? Which cities are models of sustainable development, management and disaster prevention?

#### **THEME 2 - LIVEABLE AND HEALTHY CITIES**

How are cities regenerated in the region? What are the new ways of living and working? What kinds of urban planning strategies can be developed?

#### **THEME 3 - GREEN AND DECARBONISED CITIES**

How can green technologies help tackle the challenges of tomorrow and ensure the ASEAN countries' prosperity?

#### **THEME 4 - INCLUSIVE AND WELCOMING CITIES**

How to ensure well-being in cities? What measures can be taken to preserve cultural identities, living together and uprooted communities?

### **HOW TO SUBMIT YOUR PROPOSAL?**

Submit your **300 to 400-word abstract and 100-word bio-bibliography (Word format)** to Prof. Sabine Chaouche (sabinec@sunway.edu.my) and Dr Jolyne Khor Kuan Siew (kuansiewk@sunway.edu.my). Include your details (professional email address, position and affiliation) and indicate who the main corresponding author will be.

We intend to publish the full papers (5,000-8,000 words) in a Scopus-indexed edited volume.

The language of the conference is English.

The AECC 2022 will be a hybrid conference.
