

RCE-GREATER PWANI

WORLD ENVIRONMENTAL DAY(WED) CELEBRATIONS

Pwani University in partnership with National Environmental Management Authority (NEMA) has established a **botanical garden** to promote **Environmental Education** and ITK for **Sustainable Development**. It consists of different plant species (herbal, succulents, cosmetics, fruits and timber) from different ecosystems.

The role of the Botanical Garden is to maintain documented collection of living plants for the purpose of *research, conservation, education and recreation*. This is one of the flagship projects implemented under the umbrella of **RCE-Greater Pwani**. The Botanical Garden showcases thematic segments such as medicinal, wild-food plants, cosmetic and ornamental plants, as well as rare and endangered plant species.
